International Journal of Plant Science

- Resprouting at the global scale
- Nitrogen-fixing trees
- Phosphorus cycling and ecto- and arbuscular mycorrhizal trees
- Floral volatiles and artificial selection in Brassica rapa
- Tansley reviews 50 years of Arabidopsis research: highlights and future directions
CONTENTS

Forum

Commentary

891 Nitrogen limitation disappears with succession in many lowland tropical rainforests – as expected. Why persist the temperatures latitude?

894 Mycorrhizal phosphorus economies: a field test of the MANE framework

Letters

896 Lichen-associated fungi from Paleogene amber

897 Retention, erosion, and loss of the carotenoid biosynthetic pathway in the neophytophysor green algal genus Polytomella

904 Climate change goes underground – a response to Maurin et al. (2014)

910 Multiple routes underground? Frost alone cannot explain the evolution of underground trees

914 An R2R3-MYB transcription factor regulates carotenoid pigmentation in Nicotiana attenuata

928 Overexpression of the potassium channel TPKb in small vacuoles confers osmotic and drought tolerance to rice

945 Ubiquitin-conjugated degradation of golden 2-like transcription factor is mediated by CUL4-DDB1-based E3 ligase complex in tomato

965 Microtubule dynamics of the centrosome-like polar organizers from the basal body of Marchantia polymorpha

999 The hidden season: growing season is 50% longer below than above ground

0140 Multiple paths underground? Frost alone cannot explain the evolution of underground trees

Review

Tansley reviews

921 50 years of Arabidopsis research: highlights and future directions

935 Higher survival drives the success of nitrogen-fixing trees through succession in many lowland tropical rainforests

949 Nitrogen limitation disappears with succession in many lowland tropical rainforests – as expected. Why persist the temperatures latitude?

Aims and Scope

*New Phytologist* offers rapid publication of high quality, original research in plant science. Falling within four sections – Physiology & Development, Environment, Interaction and Evolution – articles cover topics that range from intracellular processes through to global environmental change. Cross-disciplinary approaches are particularly encouraged but for guidance the journal is organized as follows and recognizes that techniques from molecular and cell biology, and functional genomics through to modelling and system-based approaches will be applied across the whole spectrum of plant science:

- **Physiology & Development**: intra/inter-cellular signalling, long-distance signalling, physiology, development, eco-devo – phenotypic plasticity, transport, biochemistry.
- **Environment**: global change and Earth system functioning, environmental stress, ecophysiology, plant–soil interactions, heavy metals.
- **Interaction**: multitrophic systems, mycorrhizas and pathogens, fungal genomics, nitrogen-fixing symbioses.
- **Evolution**: molecular evolution, population or quantitative genetics, mating systems, phylogenetics, speciation, plant–enemy coevolution, evo-devo.

All papers must focus on timely research that provides new insights into the broad principles of plant science. The topic should be original, addressing clear hypotheses or questions and of general interest to our readers. In addition to original research articles, short Letters and other submissions to the Forum section, as well as Research reviews, Rapid reports and both Modelling/Theory and Methods papers, are also encouraged. Please refer to the full Author Guidelines for further information (www.newphytologist.com).

About New Phytologist

- *New Phytologist* is owned by the New Phytologist Trust, a not-for-profit organization dedicated to the promotion of plant science, facilitating projects from symposia to open access for our Tansley reviews.
- We are committed to rapid processing, from online submission through to publication ‘as ready’ via Early View – our average time to decision is <27 days.
- There are no page or colour charges and a PDF version will be provided for each article. Authors may opt to make their article ‘open access’ by subscribing to the Wiley Blackwell Online Open service.
- The journal is available online at Wiley Online Library. Visit www.newphytologist.com to search the articles and register for table of contents email alerts.
- If you have any questions, do get in touch with Central Office (np-centraloffice@lancaster.ac.uk) or, if it is more convenient, our USA Office (np-usaoffice@lancaster.ac.uk).
- For submission instructions, subscription and all the latest information visit www.newphytologist.com.

Information for subscribers

*New Phytologist* is an electronic (online-only) journal published as 16 issues per year. Four parts form a volume and four volumes are published annually. Institutional subscription prices for 2016 are US$7066 (Americas), €2796 (Europe), £2077 (UK), US$4743 (Rest of World). Prices are exclusive of tax and include access to the current and all online back files, where available. For other pricing options and further information visit http://ordering.onlinelibrary.wiley.com/subs.asp?ref=1469-8137&doi=10.1111/
